

SILICONE RUBBER PRODUCTS

SILICONE RUBBER PRODUCTS:

Silicone Transparent tubings are used in some of the surgical operation equipments, food industries, dairy equipment industries, and auto winding machines. They are nontoxic inner.

ADVANTAGES:

- Wide service temperature range -50°C to 300°C
- Toxicologically and physiologically inoffensive
- Excellent ageing property.
- Compression set resistance.
- Excellent resistance property at low and high temperature.
- Good flame resistance.
- Food safe.
- Very Good electrical insulation property.
- Resistance to ozone, weather and ultra - violet.
- Very good chemical resistance.

FOOD SAFE, RESISTANT TO CHEMICALS:

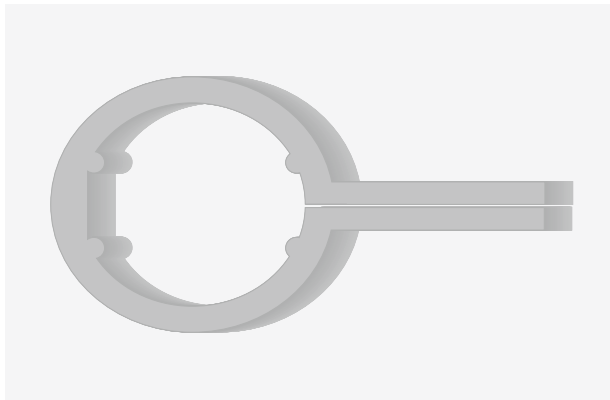

The low temperature flexibility is inherent to the material and therefore, plasticising additives are not necessary. Most types of silicone are physiologically compatible as well as inodorous and insipid. Silicone does not adhere to sticky surfaces and is excellent.

Profile

APPLICATIONS:

Sealings for refrigerators and freezers, cooling units, production of foods, milk and beverages, medical and laboratory equipments.
